Level: Intermediate
Duration: 3.5 hours
Date: 26 March 2026

Certificate of attendance for Hugo Oliveira

Foundations of LLM Mastery: Fine-tuning on multi GPUs

Scaling fine-tuning of large language models (LLMs) to multiple GPUs can unlock new levels of performance and efficiency, making it accessible for industries of all sizes.

Through guided exercises and real-world examples, this course provided participants with the skills to fine-tune LLMs efficiently across multiple GPUs, preparing them to tackle complex, large-scale projects, optimizing their workflows for both speed and scalability.

During the course participants developed a foundational understanding of techniques to distribute model parameters and states across GPUs on several nodes.

Topics covered:

- Introduction to Slurm
- Distributed data parallel
- Hugging face accelerate
- Metrics & monitoring
- ZeRO & DeepSpeed
- FSDP
- 3D parallelism
- Hands-on exercises

Course content level:

- Intermediate

Course format:

- Online lectures, demos, and hands-on labs of **3.5 hours** (breaks excluded)
- Equivalent to **0.125 ECTS** credits

Lectures taught by:

- Simeon Harrison (AI Factory Austria AI:AT)
- Martin Pfister (AI Factory Austria AI:AT)

Hands-on labs:

- Conducted on the Booster partition (A100 GPUs) of LEONARDO

Organized by:

- AI Factory Austria AI:AT
